Boulton and Watt steam engines
installed in HMS Congo 17
at Portsmouth Dockyard 80
used for the first generation of Royal Navy steamships 17

Bowes-Smith, Arthur 101
Boyle, Captain the Hon. Courtenay
elected to the Royal Society (1814) 16
Naval Fellow of the Royal Society 17

Bramah, Joseph 86
Breadhower, John: Portsmouth bookseller 103
Brest, blockade of the French fleet at, using Torbay as anchorage (from 1798) 41
Brilliant (East India Company ship): repaired at Portsmouth Dockyard (1782) 101
Brixham reservoir 67
Brunel, Marc Isambard
automatic mortising machine for the shell of pulley blocks 87–89
boring machine 86–87
Chief Engineer, New York 62
circular saw for cutting logs for shells and sheaves for pulley blocks 66, 86, 90
coaking machine 91–92
corner saw 89
helps to train the workmen at the Block Mills, Portsmouth Dockyard 22
introduces the principle of the crank to mortising machines 88
leading light for Maudslay, Bentham and Goodrich 85
machines produced by him are mainly semi-automatic 85
marries Sophia Kingdom, daughter of William Kingdom 62
milling machinery 22
offers his patented machine drawings to the Taylors and to Samuel Bentham 62
proposer for John Knowles’s election to the Royal Society (1822) 17
at the reading of Robert Seppings’ paper (10 March 1814) 15
rounding saw 91

bucket dredger driven by steam engine
completed in Portsmouth Dockyard (1802) 28
designed by Bentham, first of its kind 28
dredging depth reaches 26ft below low water (1812) 28
second dredger built to work in the Thames 28
Bucknell, Thomas: Builder Assistant at Portsmouth Dockyard 104
Budgen or Budger, John: scavelman and landlord 104
Bunce, Samuel
   designs Block Mills in Portsmouth Dockyard with Edward Holl 64
   works in the Inspector General’s department (1800) 21
Burnett, Sir William (FRS), Director of Medical Services 18
Burr, James
   career 83n
   works in the Inspector General’s department (1800) 21

transfers land at Weevil to Victualling Board (1828)

transfers land in Portsmouth for a new Victualling store (1800–1801)

P

Palma, Duke of: tours Portsmouth Dockyard (1768)

Parys Mine Company

paying off

Peace of Amiens (1802)

influence on operational availability of line-of-battle ships vs frigates and below

welcomed by Portsmouth Dockyard for consolidation

Peake, Sir Henry

builds Block Mills in Portsmouth Dockyard with Nicholas Diddams

first assistant master shipwright at Chatham

opposition to Robert Seppings’ principles

Surveyor of the Navy (1806–1822)

Peake, James: works in the Inspector General’s department (1800)
Peake, John, Navy Board Surveyor (1806–1822)
   extra assistant Civil Engineer and Architect 60
   fellow shipwright apprentice at Chatham with Bentham 60
   suggests metal standing rigging 25

Pelican Life Company 104
*Philosophical Transactions* (1814) 15
Phoenix Insurance 104
Pickard, James 88
*Pickle*, HMS (1799), armed schooner
   present at Trafalgar 32
   repairs completed in Plymouth by Joseph Tucker before Trafalgar 34
   wages expended on repair £139 5s 4d 32

Pitt, Thomas: Clerk of the Cheque at the Victualling Yard, Portsmouth
   salary 39–40

**PLYMOUTH ROYAL DOCKYARD**

*Conqueror* (74), HMS (1801), inventory of tasks completed on 34
   fire-proof buildings to Bentham’s plans 27
   Joiners’ and Carpenters’ Shop, Simon Goodrich’s plans for 67
   *Pickle*, HMS (1799), inventory of tasks completed on 34
   reservoir, Simon Goodrich’s plans for 67
   rope production 53

Tucker, Joseph, master shipwright
   brother of Benjamin 59
   dockyard papers and work refitting ships present at Trafalgar 31–34
   gives details of what work is done when ships go into Ordinary 32

Victualling Yard
   officers petition for equal pay with Portsmouth (1803) 41
   predictions of demand (1794–1815) 41
   single system with Deptford and Portsmouth 37

Pococke, Dr Richard 94
Poole, Jeffrey, MP 60
Portsea Concert Room, St George’s Square 104
Portsea Island 95
Portsmouth
bake house (Victualling Board’s) in
   built in 1740 35
   contains only six ovens 35
   fire hazard 35
bankruptcies in 96
bookshops
   great variety of books available 103–104
   senior dockyard workers good customers 103, 104
Camber 100–101
coroner 102
description (1748) 95
fire insurance agents (1783–1805) 104
fleet reviews (1773 and 1778) 98
medicine and drug warehouse 103
military control of, eighteenth century
   curfew guns 98
   military posts 98
   opening and shutting town gates 98
Naval Academy: pupils get drunk in town 99
population (1725–1811) 94
Portsea: street names introduced 104
prisoners of war 95
sailors cause problems in
   complaining about poor food on HMS Namur (January 1758) 99
   demolishing a public house (March 1758 and February 1766) 99
   paid off from HMS Apollo and HMS Arethusa (April 1802) 99
St George’s Church: built by dockyard workers (1753) 97
storehouses for dry provisions
   large building added (1782) 36
   originally one storehouse (1740) 36
street names introduced to Portsea 104
Suckling, Maurice (1726–1778), Naval Comptroller, returns as MP 97
town clerk 102
town life effectively controlled by
garrison governor 98
mayor 98
resident dockyard commissioner 98

PORTSMOUTH ROYAL DOCKYARD

Admiralty Progress Books, hold near complete records of ships entering 50
Admiralty Visitation (1802) 62–63
Bentham’s plans to reorganise 26, 59

Block Mills

Samuel Beach, superintendent 68, 71
building designed by Samuel Bunce and Edward Holl 64
built by Portsmouth Dockyard’s craftsmen under Henry Peake and Nicholas Diddams 64
Commission of Naval Enquiry (1802) 59
conceived by Bentham 63
construction of (1802) 62
furnaces constructed 68
include Wood Mills, Metal Mills, and Millwrights’ shop 63
machines designed by Marc Isambard Brunel 60
Mirza Abul Hassan Khan, Persian Shah’s representative, tours (1810) 93
productivity of output 55, 78
run by Simon Goodrich 65
savings to the public 22, 78, 79
state at 3 October 1805 74
supply all the navy’s blocks by 1807 55, 78
swing arm circular saw 66
workforce

efficiency of 55, 58
pay and conditions for 69–74
recruited from outside the Dockyard 64

blocks, wood

automatic mortising machine for (Brunel’s) 87–89
circular saw for (Brunel’s) 86, 90
coaks for 78, 92
manufacture of 55–8
metal bushes 61
smaller vs larger 60
supply of, to the Royal Navy 56, 78
Boat Pond converted to a basin by Samuel Bentham 26
boiler house (1830) 80
bucket ladder dredger driven by steam engine, designed by Samuel Bentham (1802) 28
Camber Docks
capable of docking two large frigates or three sloops 26, 52
converted from North Camber or channel by Bentham 26, 52
divided by a caisson 26
steam engines for 26, 67
circular sawing machines, Samuel Goodrich’s drawings for 67
Clerks of the Cheque

Sir Henry Peake 60, 64

Mr Waugh 106
Metal Mills, introduced by Bentham (1803)
  copper melter, pay of 71–72
  furnacemen 72, 74
  improve quality of metal and remove reliance on copper merchants 25, 68
  iron knees replace wooden knees 53
  major supplier of copper for the Royal Navy 25, 53, 58
  make metal parts for blocks 63
  manufacture cast iron, mixed metals and copper sheathing 25
  plans of 52
  re-process copper 25, 60, 68
  run by John Lloyd 64
  savings to the public 25, 78, 79
  smelt, cast and roll metal 25
  use commercially established and proven developments 51
  use spare steam capacity from pumping docks 60
  workforce pay and conditions 70–72, 74

mill for making cement
  built by Simon Goodrich 65
  horse-powered 28
  introduced by Samuel Bentham 28

Millwrights’ department
  help to fit and improve articles used on board ships 24
  introduced by Samuel Bentham 24, 53
  make machine tools for other dockyards 24
  maintain the whole water system including the fire extinguishing systems 24

mud barges, to accompany the steam dredgers 28

North Basin
  capable of docking seven or eight frigates 26, 52
  converted from North Boat Pond and channel 26, 52
  most cost-effective improvement in the Royal Dockyards 52
  steam engines for 26

Peace of Amiens welcomed for consolidation 49
performance increase during Napoleonic Wars 51
Prince and Princess of Wales visit (1803 and 1805) 93
Pump House
   12HP steam engine erected by Simon Goodrich 65
reciprocating saw mill, Simon Goodrich’s drawings for 67
reservoir, improved by Samuel Bentham 27, 60
Ropery and Sail Cloth Manufactory (1804) 25, 53
   Master Ropemaker sidelined 53
   steam power a fire risk 53
sailings from, by ship type 49
sawmill
   introduced by Samuel Bentham 24
   pumping and sawing apparatus 73
seasoning timber
   Samuel Bentham’s experiments 26–27
   sheds established by Lord Sandwich 26
   workshop built over the reservoir 27
Sheffield, W. E.: Master of the Mills 25
smiths 53, 67
steam dredger, designed by Samuel Bentham 28, 52
steam engines at
   12HP machine 67
   30HP machine 67
   50HP machine 67
   ballast-heaving engine 67
   to drive pumps and machinery 23, 67
   to pump fresh or sea water in case of fire 27
Storekeepers
   John Allcott 104
   John Greenway 105
